

SKYPE USB HANDSET

THE FIRST USB HANDSET DESIGNED EXCLUSIVELY FOR SKYPE

FR-33.1

IPEVO's Best-selling USB handset for Skype

As one of the first plug-in handsets designed exclusively for Skype, IPEVO FR-33.1 has earned a reputation for its seamless integration with the world's most popular VoIP software in an easy-to-use device.

Simple, intuitive and fully integrated with Skype

The functions and buttons on the FR-33.1 are tailor-made for the Skype experience, which takes a lot of the guesswork out of placing calls via a computer. A "s" key activates the Skype window on your desktop, a toggle "buddy job" to let you effortlessly scroll through your contact list. Or simply press the "+" key to initiate a SkypeOut call, and use the number pad to dial out just like a regular telephone.

Exceptional sound quality with noise and echo cancellation

Engineered and optimized for Skype, FR-33.1 delivers exceptionally clear call quality with 16K sampling rate for Skype-to-Skype calls, and 8K sampling rate for calls to landlines. The unique "hollow" mouthpiece design minimizes the annoying "echo" effect.

Key Features

- PC and MAC compatible
- Integrated Skype interface
- Excellent voice quality with echo cancellation
- Programmable buttons to enable customization
- Lightweight and ergonomic design
- Available in black and white
- Awards: iF, reddot, G-Mark, I.D. magazine honorable mention
